This booklet is not intended to replace the advice of a medical professional, nor is it intended to be a substitute for medical care.

The pain can be in or around the eye. Oftentimes, the pain is caused by fatigue, a scratch or allergies.

What to do at home

Rest:
Reduce your screen time.

Compresses: Apply hot or cold compresses using a clean cloth.

Glasses: Wear your glasses instead of your contact lenses.

Precautions: Do not touch your eyes. If you have to, wash your hands before doing so.

Tears: Blink more or use artificial tears.

Allergies: Avoid whatever is triggering your allergies.
